Page 2 1 2. (Proceedings began, 4:03 p.m.) 3 SENATOR MCCLENDON: I'm Jim McClendon, 4 and I'm Senate Chairman of the Redistricting 5 6 and Reapportionment Committee. On my right is Chris Pringle. Chris is the House Chairman of Redistricting. And on my left is Dorman 8 9 Walker, who is the hearing officer. He's an 10 attorney and he works for this committee. 11 just happens we also have with us here at the 12 state house in Montgomery, Senator Steve 13 Livingston and Senator Bobby Singleton are sitting in with this. 14 15 I would ask each of you that are coming 16 in remotely to please mute your microphones. 17 Mute your mics and turn off your cameras. 18 Somebody has already told you to turn off the cameras because a bunch of them are off. 19 20 Thank you very much. What happens with the mics, when the mics are on, we find we get a 21 2.2 very aggravating echo. 23 So the purpose of public hearings 24 dealing with redistricting is to get your input into the process of redrawing maps for 25

the congressional districts, the State Senate districts, the state House of Representative districts, and the State Board of Education districts. This committee's responsibility is to have something prepared for when we expect the governor to call a special session -- perhaps in October but that's up to the governor -- at which time bills will be filed that will go through the normal legislative process just like any other piece of legislation. Hopefully go through the house, the senate, and over to the governor so that we will have the new districts ready for the primaries May 24th of 2022.

Now, the reason we do this is to try to maintain the One-person, One-vote ratio in all of our districts, or close to that. These districts change over a ten-year period, the last time we did a census. People move. Population of districts go down and some districts go up. And we have to go in and adjust the geography of the district in order to capture the appropriate number of people that live there to stay with the One-person, One-vote. Let me give you some examples of

2.

2.2

what we're having to work with.

Let's take the senate districts that are in your area. And I'll go over changes that have been made there, changes in populations that have been made and that this committee will have to deal with. And we're getting your input on how to make changes.

Now, first, let me tell you an ideal senate size population in the next -- on the new maps we're drawing will be 143,551 people. So that's what we're looking at. Now, we can go plus or minus 5 percent. We do have that latitude. And we can do the same thing with the house district and same thing with the State Board of Education districts. However, the congressional districts have to be essentially zero deviation.

So let's first look at Senate District 5, which has in fact lost 4,500 people over the last ten years. I'm going to drop down to 15, Senate District 15, which has gained 11,800 roughly, a very substantial gain. And there will have to be changes made to that district to get it back where it needs to be. District 16 has gained 3,370, and District 17

2.

2.2

has about 1300 increase. And then that brings us to District 18 who has lost 7,000 people. District 19, it was a loss of 13,700 approximately. And in District 20, there was a loss of population of about 11,600. So those are significant changes which puts them outside the deviation. So changes are going to have to be made to the way those districts appear, the geographic area, and the number of people they capture.

So let's take a look then at some house districts. We have quite a few in this area. I'll start out with House District 14 lost 4,400. And the district next to it, District 15, gained 5,000. So you can see how that line is going to have to be adjusted. District 16 lost 2,600. These numbers -- I'm kind of rounding them off, but they're close enough for you to see the trends in any district. District 44 gained 2,700. 45 gained about 3,000 people. 46 gained about 2500 people. 47, District 47, lost 465. District 48 gained 5,400. District 51 gained 641. 54 lost 3,000. 55 lost 6800. District 56 picked up 2,000. District 57 went down by

23

24

4,900. 58 went down by 3,000. 59 went down by 6,000. And 60 went down by about 4,300. So you can look at these numbers, and none of these districts stayed exactly the same. Any district that had an increase in population enough to get them outside the allowed deviation, we're going to have to adjust that district down in size. The geographic area will be -- districts that have lost population that are outside that plus or minus 5 percent, we'll have to increase the size of that or capture some people.

Now, it is my pleasure to turn this over, the next step, giving this to

Representative Chris Pringle, who is the House Co-Chair of redistricting and reapportionment.

Chris.

STATE REPRESENTATIVE PRINGLE: Thank you, Senator. Again, my name is Chris Pringle. I represent House District 101 in Mobile, Alabama. I'd like to welcome you.

We will call the people who have signed up to speak in the order that they signed up. You'll be limited to three minutes. If we have time at the end and you have more to say,

2.

2.2

we'll allow you to come back up and speak.

When you're called, please come to the microphone, state your name and the community you represent, and the district, or districts, you want to talk about. If you are participating remotely, send us your questions and we'll read them into the record and answer them.

This hearing is being transcribed by a court reporter working remotely. If you have something you'd like to introduce into the record as an exhibit, bring it to the microphone when you speak and let the hearing officer know. He will get it to us, and it will be permanently attached to the record. It will be put into the record permanently.

I'd like to remind you today's hearing is strictly on the issue of redistricting, and we are not here to discuss any other issue pending before the legislature. Thank you.

And, Mr. Walker, your turn.

MR. WALKER: Hello, again, I'm Dorman Walker. I'm the hearing officer for this hearing.

Some administrative matters first. Will

2.

2.2

Page 8 whomever is in charge of the Lawson State side 1 2. e-mail to us, please, the sign-in sheet? e-mail address is Donna, D-O-N-N-A, dot, 3 Overton, O-V-E-R-T-O-N, at alsenate dot gov, 4 so we know who to -- who to call on. 5 6 There we go. Thank you. 7 In addition, if there are any members of the media covering the hearing, we like to 8 9 keep track of media coverage of these 10 hearings. If you care to identify yourself, 11 we'd like to know who you are. Anybody in the 12 media there at the auditorium? 13 Could you identify your station or come to the mic, please? Thank you, sir. 14 15 MR. MICHAELS: Ryan Michael from the Birmingham Times. 16 17 MR. WALKER: Thank you very much, 18 Mr. Michaels. And am I coming through clear? 19 There was a complaint earlier about the 20 microphone. Is this okay? 21 All right. The legislative can't just 2.2 draw districts any particular way. It's done 23 by both the constitution and law and by the 24 quidelines that it itself adopts. The first 25 of these requirements that binds the

legislature is, of course, the federal Constitution, in particular the Equal Protection Clause, and in addition to that, in the context of redistricting, Section 2 of the Voting Rights Act, which is the workhorse section of the Voting Rights Act, and forbids discrimination and vote dilution. And both of those prohibitions apply to redistricting.

So all districts have to comply with the Equal Protection Clause and with Section 2 of the Voting Rights Act. With regard to population, of course, the goal, as you've heard, of redistricting is to equalize the population of districts following demographic changes that occurred over the last ten years since the last census. Congressional districts in most cases, including Alabama, can have minimal deviation. We could have a greater deviation in the other districts, the House District, the Senate District, and the State Board of Education districts. ideal population is the concept about you'd take the state population and divide it by the number of districts that you have.

For example, in the house, 105 house

2.2

23

2.4

districts divided into the new state population of a little bit over \$5 million -- I mean, 5 million people gives you the 47 and whatever ideal population. And we can vary from that when we draw districts by 5 percent above or 5 percent below that ideal population. And that variance gives the -- gives the legislature some flexibility to differ populations among districts so that it can keep counties whole, so it can respect jurisdictions and communities of interest and accomplish other interests that are represented in the race-neutral criteria that it has.

And districting is done in accordance with the race crucial -- race-neutral, excuse me, criteria with the exception that at times the district -- the redistricting may look at racial criteria as required to fulfill the State's obligations under Section 2 of the Voting Rights Act. And that would be when there is a strong basis of evidence to believe there is -- weren't for such a race-based choice. Strong basis of evidence exists when there's evidence -- good reason to believe

2.

2.2

2.4

that race must be considered in order to satisfy the State's obligations under the Voting Rights Act.

Districts have to be reasonably compact, and we try to put as few counties into a district as possible for that purpose. Districts have been to be contiquous, which means all parts of one district must be in contact with either the outer borders of the state or other districts. Contiguity is allowed across border. For example, if you -if your county is divided by a river or lake or by Mobile Bay, you can have contiquity across that. Point-to-point does not count as contiquity, but that's less an issue with legislative districts. Districts are drawn to total population. The Census Bureau reports population in many different ways. We can get population, total population, which is simply everybody who was in the state -- thank you -on April 1 and regardless of whether they can vote or not. We can get voting age population which is 18 plus. We can get CVAP, which is citizen voting age population, which really comes from a different source than the census.

13

14

15

16

17

18

19

20

21

2.2

23

24

And we can get population broken down by all sorts of demographic standards.

For redistricting we typically use just voting age population -- total population, although voting age population may be used at time to comply with the State's obligations under the Voting Rights Act. Other requirements are that there must be 35 senate districts and 105 house districts. All of those districts are single member districts. That is, each district elects a single representative or Senator.

When drawing districts, contests between incumbents are avoided. And the cores of existing districts are to be respected and protected to the extent possible. Districts also shall respect communities of interest, neighborhoods, and political subdivisions to the extent practicable. A "community of interest" is defined as an area with recognized similarities of interest including but not limited to ethnic, racial, economic, tribal, social, geographic, and historical identities. The term "communities of interest" may under some circumstances include

2.

2.2

2.4

political subdivisions such as counties, voting precincts, municipalities, tribal lands, reservations, and school districts.

The discernment weighing and balancing of the varied factors that contribute to communities of interest is an intensely political process best carried out by the elected representatives of the people.

Having gone over those rules, I'm now going to call on people to talk. I'll call first on everybody who signed up to talk. And I'll see if there's anybody else in the auditorium who wants to talk. And then I'll see if we have any e-mail questions from the people who are participating in the hearing virtually. And then, finally, I'll ask again if there's anybody in the auditorium who wants to speak.

First, we have David Russell who wants to speak on looks like all of the districts.

 $\mbox{\rm Mr.}$ Russell, would you please come to the podium.

MR. RUSSELL: First of all, let me say good afternoon to everyone. I think this is the most crucial time of an election. This is

2.

2.2

the redistricting part. This is why we determine who can be representing us in our district.

I really have three concerns -- I really have three concerns. My first concern is that we shouldn't -- in Jefferson County, for example, I think Jefferson County surrounds themselves when they represent their House of Representative and their Senate. They go outside the county and bring in -- bring in voters or bring in citizens. I wish that Jefferson County could stay within the bound area of Jefferson County, not go out to the nearest next county for them in order to get the number that they need.

My second question would be is that I wish that each senator would have three house members instead of having the house members divided among all. Some senators will have four or five house members. Back in the day, that one senator would have three house members would make up that particular district. Therefore, you would have to go into the other part of the county to pick up additional people.

2.

2.2

And this might be a little contrary to what we're here today to do. You know that in -- in the State of Alabama we have two school board districts. Now, we have no one of minority have ever -- I shouldn't say ever -- cannot win statewide in the way the system is set up. When we look at the supreme court, I think we should relook at the supreme court and have the supreme court to run an eight district -- we have eight districts and the presiding president of the supreme court run statewide. And I wish that would also apply to the public service commission. means that if we do it that way, we have two African-Americans on the school board. means we would pick up two African-Americans on the public service commission, and we would pick up two African-Americans on the supreme court.

Those are my basic concerns that I have today. Thank you very much.

MR. WALKER: Thank you very much,
Mr. Russell. Of course, the scope of the
hearing today is on legislative redistricting.
This committee can't do anything about the

24

Page 16 composition or how we elect members to the 1 2. public service commission or to the supreme court. But thank you for your comments on 3 those points. 4 Thank you. 5 MR. RUSSELL: MR. WALKER: Next we have Pat Dewees. 6 Good afternoon, sir. Did I -- would you state your name 8 9 correctly for the record? I may have 10 mispronounced it. 11 MR. DEWEES: You pronounced it 12 correctly. MR. WALKER: Okay. Thank you. 13 MR. DEWEES: I'm -- I live in Cahaba 14 15 Heights, which is in the Sixth Congressional 16 District for the record. I propose that -- I 17 propose that a congressional district 18 containing all of Jefferson County be drawn. 19 According to the 2020 census, the State of 20 Alabama has a population of 5,024,279. 21 when divided by seven, is 717,754, which is 2.2 43,033 more than the 2020 census population of 23 Jefferson County. One of Alabama's seven 24 congressional districts should include all of 25 Jefferson County and about 43,000 from an

adjacent county. Shelby County would be the most appropriate county for that -- for this purpose since it is more typical of the Birmingham metro area than any of the other counties adjoining Jefferson County.

Metro Birmingham has been divided between two congressional districts for 30 years. This was done to create a majority black congressional district. I certainly understand a need for such a district in Alabama. However, a mostly black district could be -- could likely be maintained by extending the current Seventh Congressional District further south and/or further east. Throughout the county, urban areas have had different voting patterns than rural areas --I mean, throughout the country, urban areas have had different voting area than rural Alabama is no exception. areas.

I would also say the Birmingham area is not only different from rural areas, but it is also different than the other major metro areas in the state. The Birmingham area is different from most of Alabama in its culture, politics, value, history, and demographics.

1

23

2.4

Thus, it is no surprise that the powers-that-be want Birmingham divided in representation. Gerrymandering has been a thorn in the side of politics ever since Massachusetts Governor Elbridge Gerry coined the phrase in 1812 upon seeing his congressional district which resembled a salamander.

The Birmingham area needs a unified voice in Congress. Based on what I know about politics, this Birmingham-based district would be a competitive one. Having a competitive congressional election in Alabama, even if it is just one, would make Alabama politics healthier.

Thank you. That's the balance of my time.

MR. WALKER: Thank you, Mr. Dewees.

You'll be glad to know that the League of

Women Voters has prepared a plan that does

create a district that is mostly Jefferson

County in terms of population, although it is

not Shelby County as you would prefer. It is

Bibb, Hale, and Perry County. And we'll see

where that plan goes.

2.

2.2

2.4

Page 19 Thank you for your comments. 1 2. SENATOR SINGLETON: Mr. Chairman, if you 3 would, I would like to go on record to say that I will be introducing that plan on behalf 4 of the League of Women Voters. 5 6 MR. WALKER: Senator Singleton says he will be introducing that plan on behalf of the 8 League of Women Voters. 9 So thank you, sir. 10 Next up we have Dana Echols (sic). MS. ELLIS: Good afternoon. Clearly my 11 12 handwriting is not very good. My name is Dana 13 Ellis. 14 MR. WALKER: Oh, sorry. 15 MS. ELLIS: That's quite all right. the -- I live here in Jefferson County. And 16 17 I'm the President of the League of Women 18 Voters of Greater Birmingham. So it's 19 interesting that you've researched the map. I 20 know you have seen it. I will not spend a lot 21 of time on it. But I wanted to explain why I 2.2 feel strongly that counties should be 23 considered a community of interest. 24 I've lived in Jefferson County since 25 1980. I love this area. My house where I

live, I reside in District Seven. Where I worked before I retired, where my son went to school, shoot, where I do my grocery shopping, is all in District Seven. The way the current map is drawn, which is that ugly finger sticking up into Jefferson County, has created that problem for me. It's the responsibility of your committee to ensure the communities of interest are maintained intact and that all communities are fairly represented.

The current map demonstrates
gerrymandering, as the person before me spoke,
where the many African American voters are
packed into one district, District Seven.
This racial gerrymandering is the reason that
Jefferson County is split into two districts.
This packing also serves to weaken minority
voting influence in other districts. So it is
possible to correct the errors of the past.
We submit again the proposal you've already
seen from the League of Women Voters. It
respects county lines making it easier for
voters to understand where their district is.
In addition, it creates two districts that
provide black citizens an equal opportunity to

2.

2.2

2.4

Page 21 elect candidates of their choice. 1 2. I won't talk any further. Thank you for 3 your time. MR. WALKER: Thank you very much, 4 Ms. Ellis. 5 Roger Smitherman, Senate District 18, is 6 signed up to speak next. Senator Smitherman. 8 9 SENATOR SMITHERMAN: How are you doing? 10 MR. WALKER: Hello, sir. 11 SENATOR SMITHERMAN: Hey, how are you 12 doing? 13 Good. I wanted to extend that conversation a little more to let my citizens 14 15 here know that I'm actually a member of the committee that's sitting there. I just happen 16 17 not to be there. But I will be down when we 18 meet in Montgomery. I just want everyone to be aware of it. 19 20 I first wanted to say that Senator 21 Singleton, if you hear me, I appreciate you 2.2 doing that. I'll be your first co-sponsor on 23 that. I arise first to support what the lady 24 said from the League of Women Voters. We 25 definitely want our county to be whole.

just want to make clear. We want it to be whole. In fact, if you look at that map, it's -- that's 2011. We understand it's behind us. But if you look at that map, the congressional map, there are very few counties that are split. And Jefferson County is the main one that's the case. So I think that what you see proposed to you is a map that would keep us whole and keep us whole in the county. And so that I hope that we look at the objective and goal as we go forward as the committee because there is an opportunity to do that. The framework has been presented.

The second thing is I appreciate you addressing those numbers even though I have the paper, Mr. Chairman, Senator McClendon. I appreciate that. What that shows, though, is that there is a need for us to move out -- you all can get me straight on the numbers. I'm going to call a former senator, and you all tell me what that number is because I don't have that roster here. But the former Senator Cam Ward, is that 15? Is that Senate District 15? Can anybody on the committee share that with me?

2.

2.2

2.4

MR. WALKER: 14.

2.

2.2

SENATOR SMITHERMAN: 14, thank you. I think that with the -- we have two districts that are jutting into Jefferson County, or partially, really not majorly. And I think that if the one -- because Shelby County -- I didn't analyze the numbers, but I've got enough common sense to know Shelby County is growing. And if the one that's coming out of Shelby County, if it's backed back into Shelby County, those citizens that they're reaching in to get will make up these numbers that we may need to adjust in the areas where we've lost.

So I think it's pretty similar to help us, to keep us whole where we may or may not have to have one. And I think our majority leader, without having to call names, I think that district probably would need to stay because we've got to have one to take up that access or either bring in whatever may be necessary if that's the case. But I think that would solve that problem considerably. And I would hope that we would look to those ends as we look at those numbers and look at

the goals in which is stated to keep the counties as whole as possible to be able to do that.

One good thing I will say about the minority districts in particular in Jefferson County is that we are located inside of the county. So we -- you know, just a matter of us being able to move out to where we need to pick up the necessary population. I will say that -- I appreciate you all being here and having the hearing. And as I said earlier, I look forward to seeing you in our hearing in Montgomery. And of course I look for when we -- it's obvious we're going to have to come down in special session.

So I look forward to working with you all as we move forward. Thank you all very much.

MR. SINGLETON: Mr. Chairman, if you would, I would like to say to my senior member of the committee, the ranking member, ranking minority member, I will yield to you to allow you to file that on behalf of Jefferson County.

SENATOR SMITHERMAN: All right. We'll

2.

2.2

Page 25 work together hand in hand, and as we will 1 2. with the committee and with the majority, to try to come up with a district that will 3 represent Alabama all the way around. 4 Thank you all very much. 5 6 MR. WALKER: Thank you. 7 Thank you, Senator Smitherman. 8 Is there anyone else in the auditorium 9 who wishes to speak at this time? 10 All right. We have one question which 11 is about whether or not these hearings are 12 Initially, the hearings were being recorded. 13 recorded because we had a problem with the court reporter and to assist the court 14 15 reporter. But the official record of the 16 hearings is the transcripts that are being 17 prepared, not recordings of the hearings. 18 And, henceforth, so long as we have a court 19 reporter present, the hearings are not 20 recorded. 21 Sir, do you have -- wish to speak? 2.2 MR. MILLER: Yes. 23 MR. WALKER: Would you state your name 24 for the record, please? 25 MR. MILLER: Yes. My name is Michael

Miller.

21

2.2

23

2.4

25

MR. WALKER: Thank you.

First, let me start by MR. MILLER: saying that I agree with Senator Smitherman when he says that the county needs to be kept whole when we talk about our state, state representatives, and state senators. Jefferson County being the largest county, we know that with our current population we can support 4.7 state senate seats. So that means we're going to have to go outside of our district -- outside of our county in order to be able to compose that fifth complete district. So what that means right now, we have three minority senators that's elected from wholly inside of Jefferson County. So that means that we'll have at least two other districts, one of which that's going to have to be drawn from outside and bring in voters and residents from outside of Jefferson County in order to make that district.

Now, with that being said, that gives

Jefferson County a chance to have some control

instead of having others voted in from outside

that have no stake in Jefferson County in

order to be able to take away our local rights, to be able to get with our local elected officials in terms of our state senators and house members.

Now, with that being said, let me move on to the map of our congressional districts. I completely disagree with having a map drawn that includes whole counties simply because African Americans in that vote -- in a district or districts like that, African Americans would not have control of their own destiny. We would be at the control and the destiny of others hoping that the communities of interest come together and vote.

So with that being said, we have our own maps that we've drawn. And we're going to submit those maps with the proper sponsorships and get those maps in because we believe that a fair amount with African Americans making up 25 -- 27.2 percent of this statement, we only represent 14 percent of the congressional seats. So in order to bring us up to the 20 -- to bring us up to that quarter percent that we represent or more of this state, we need to have two of those house seats. And

2.

2.2

Page 28 the only way we can do that is to draw seats 1 2. that make sense that have blacks as the majority population as well as the majority of 3 the voting age population. And than can be 4 accomplished by simply sitting down and 5 6 looking at maps and drawing maps that favor those in the district. Thank you. 8 MR. WALKER: Thank you. Sir, you 9 mentioned that -- I think if I understood -- I 10 don't want to put words in your mouth -- you 11 are a member of a group that has prepared 12 Do you want to say who the group is or 13 not at this point? MR. MILLER: Alabama Election Protection 14 15 Network. MR. WALKER: Alabama Election Protection 16 17 Network. Thank you very much. MR. MILLER: Thank you. 18 19 MR. WALKER: Anyone else at the 20 auditorium who wishes to speak? 21 We have some questions from the virtual 2.2 attendees, and we'll hear those now. 23 MS. OVERTON: From Selene Washington, 24 she said, The Reapportionment Committee redistricting quidelines say congressional 25

districts shall have minimum population deviation. I heard you say one person and zero person, no deviation. You also mentioned a supreme court ruling. What is the correct deviation allowed for the congressional districts?

MR. WALKER: In most cases, congressional districts are supposed to have minimum deviation. There are circumstances that are fairly unique in which the supreme court has approved larger deviations. I don't believe that those apply, myself, in Alabama. I know that the plan submitted by the League of Women Voters does have a larger than usual congressional delegation -- deviation. And I think that's probably an issue that we'll have to look at more carefully is whether or not we believe that's in accordance with the law. Right now I would say I don't think it is.

But let me say that the League of Women Voters is represented by some very fine attorneys. I'm sure they've done their homework and have a good argument.

MS. OVERTON: Chris Mosely in Birmingham. What is the baseline number of

2.

2.2

2.4

persons being considered for a house district?

In other words, Senator McClendon, you

mentioned that the ideal senate district is

143,551 plus or minus 5 percent, but you did

not state what the number is for the house

district.

MR. WALKER: The ideal house district is 47,850. And a house district can be populated up to 5 percent above or below that figure and be acceptable.

Any others?

MS. OVERTON: Yes. A comment coming from Karen Stanley, Urban and rural areas have very different needs. Stop gerrymandering in Birmingham and in Huntsville.

MR. WALKER: Anything else? All right.

Is there anyone at Lawson State, one last chance, who wishes to speak.

Thank you very much for coming today.

This hearing is closed.

There will be a transcript made of this hearing that will be posted in approximately two weeks on the site, on the web site for the reapportionment committee. I appreciate your attending today and for your comments.

Alabama Rules of Civil Procedure

Part V. Depositions and Discovery

Rule 30

(e) Submission to witness; changes; signing. When the testimony is fully transcribed the deposition shall be submitted to the witness for examination and shall be read to or by the witness, unless such examination and reading are waived by the witness and by the parties. Any changes in form or substance which the witness desires to make shall be entered upon the deposition by the officer with a statement of the reasons given by the witness for making them. The deposition shall then be signed by the witness, unless the parties by stipulation waive the signing or the witness is ill or cannot be found or refuses to sign. If the deposition is not signed by the witness within thirty (30) days of its submission to the witness, the officer shall sign it and state on the record the fact of the waiver or of the illness or absence of the witness or the fact of the refusal to sign together with the reason, if any, given therefor; the deposition may then be used as fully as though signed unless on a motion to suppress under Rule 32(d)(4) the

court holds that the reasons given for the refusal to sign require rejection of the deposition in whole or in part.

- (F) Certification and filing by officer; exhibits; copies; notice of filing.
- (1) The officer shall certify on the deposition that the witness was duly sworn by the officer and that the deposition is a true record of the testimony given by the witness. Unless otherwise ordered by the court, the officer shall then securely seal the deposition in an envelope indorsed with the title of the action and marked "Deposition of [here insert name of witness]" and shall promptly file it with the court in which the action is pending or send it by registered or certified mail to the clerk thereof for filing.

DISCLAIMER: THE FOREGOING CIVIL PROCEDURE RULES

ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY.

THE ABOVE RULES ARE CURRENT AS OF APRIL 1,

2019. PLEASE REFER TO THE APPLICABLE STATE RULES

OF CIVIL PROCEDURE FOR UP-TO-DATE INFORMATION.

VERITEXT LEGAL SOLUTIONS COMPANY CERTIFICATE AND DISCLOSURE STATEMENT

Veritext Legal Solutions represents that the foregoing transcript is a true, correct and complete transcript of the colloquies, questions and answers as submitted by the court reporter. Veritext Legal Solutions further represents that the attached exhibits, if any, are true, correct and complete documents as submitted by the court reporter and/or attorneys in relation to this deposition and that the documents were processed in accordance with our litigation support and production standards.

Veritext Legal Solutions is committed to maintaining the confidentiality of client and witness information, in accordance with the regulations promulgated under the Health Insurance Portability and Accountability Act (HIPAA), as amended with respect to protected health information and the Gramm-Leach-Bliley Act, as amended, with respect to Personally Identifiable Information (PII). Physical transcripts and exhibits are managed under strict facility and personnel access controls. Electronic files of documents are stored in encrypted form and are transmitted in an encrypted fashion to authenticated parties who are permitted to access the material. Our data is hosted in a Tier 4 SSAE 16 certified facility.

Veritext Legal Solutions complies with all federal and State regulations with respect to the provision of court reporting services, and maintains its neutrality and independence regardless of relationship or the financial outcome of any litigation. Veritext requires adherence to the foregoing professional and ethical standards from all of its subcontractors in their independent contractor agreements.

Inquiries about Veritext Legal Solutions' confidentiality and security policies and practices should be directed to Veritext's Client Services Associates indicated on the cover of this document or at www.veritext.com.
